

CHILDREN'S FACES

Face templates can be used for lots of different activities. If you laminate them they can also be re-used over and over again.

Here are some suggestions:

- Use for play dough mats and have children add facial features like eyes and nose.
- Give them some dry erase markers and have them draw on faces.
- Use for emotions activity teaching them about feelings and how the face looks when we are sad or happy etc.
- Have an all about me theme and have them 'create' their portrait for an all about me folder/book.
- Have magazine cuttings of facial features that can be stuck onto the faces.
- Create a busy bag and laminate face pieces that can be used with templates. Add magnet sheets so they can create on a magnetic surface like the fridge!

Have fun!
